

Annual report 2021

COMPANY

MILK PRODUCTION

In the 2021 reporting year, the raw milk of the member cooperatives in north-east Germany was produced within the region. In the past year, 94 % of this raw ingredient was collected from within a radius of 150 km of our sites. At almost 699 million kg, the raw milk supplied was again above the previous year's level. Overall, the raw milk volumes delivered could be further increased by 2 % in 2021.

GROUP RAW INGREDIENT DEVELOPMENT

| Quantity in t | 2021 | 2020 |
|-------------------------------------|---------|---------|
| Raw milk | 699,115 | 686,584 |
| Cream | 69,636 | 66,960 |
| Skimmed milk/buttermilk concentrate | 17,967 | 18,084 |
| Skim, milk/buttermilk/milk permeate | 1,035 | 915 |
| Total | 787,753 | 772,543 |

KEY FIGURES

The planned investments were also made in the reporting year. With fixed assets of €163 million (+ €19 million over previous year), Uelzena's continuing modernisation and investment plan is reflected in its result. The equity ratio achieved 34.4 % and the group's annual result was €6.7 million.

OVERVIEW OF GROUP FIGURES

| | 2021 | 2020 |
|-----------------------|------|------|
| Turnover mil. € | 766 | 670 |
| Annual surplus mil. € | 6.74 | 7.86 |
| Fixed assets mil. € | 163 | 144 |
| Equity ratio % | 34.4 | 38.6 |

The turnover in 2021 could be improved from the previous year to approx. €766 million despite the ongoing Covid-19 pandemic. A significant increase can be seen in all major product groups compared with the previous year.

PRODUCTS

Following a turbulent sales market in the previous year, the market development in 2021 resulted in a better sales situation for the Uelzena Group. After the Covid-19 related drop in the vending sector, demand rose by the end of the year to almost the same level as before Covid-19. The recovery in the gastronomy and hotel sector also increased the volume in catering packs for milk fats.

SUSTAINABLE RAW INGREDIENTS

The primary raw material milk has a particular value for Uelzena as a milk-processing company. Dairy farmers and the sustainable production of this raw material on their farms have a significant influence on how we can meet the sustainability requirements of our customers, covering areas such as the economy, environment, society and animal welfare. The results of the survey implemented in 2020, which was sent to all dairy producers in the QM Dairy Sustainability Tool, were evaluated and presented to the businesses in 2021. A focus was also placed on the procurement of raw material from risk countries, based on the BSCI risk assessment. We are constantly working on improvements and already have a high quota of suppliers from risk countries of origin certified according to human and working rights criteria.

PRODUCT DIVERSITY AND INNOVATIVE PACKAGING

Milk and plant-based raw materials are not mutually exclusive. Our existing customers are increasingly adding plant products to their milk-based portfolios and wish to react to this growing market. We are open to this opportunity for joint growth and have responded to this trend in the instant beverages division with products such as plant-based cocoa beverages and oat-based toppings. We have also expanded our range to include

organic and FairTrade products. Innovative developments were also seen in the sector of liquid blends and ice-cream mixes, both implemented at our Warmsen site. Environmentally friendly and recyclable packaging for our products is also increasingly in focus. The Uelzena Group is working closely with suppliers and custo-

mers to offer sustain-

able solutions.

GROUP SALES

Fortunately, 2021 generally exceeded the carefully optimistic expectations set out by the Group sales planning. Almost all product groups registered an increase over the preceding year. The milk powder and cheese sectors maintained the high sales level of the previous year. The highest increase was in the speciality products business area – driven by the instant beverage market. Sales also increased in the milk fats and condensed milk sectors, compared to 2020.

| | 2021 t | 2020 t | Deviation t |
|--|-----------|-----------|----------------|
| Condensed milk products, delicatessen products | 26,541 | 24,387 | +2,154 |
| Milk fat | 50,060 | 48,597 | +1,463 |
| Milk powder | 85,241 | 85,926 | -685 |
| Cheese | 31,801 | 31,697 | +104 |
| Speciality products | 42,514 | 36,288 | +6,226 |
| Total main product groups | 236,157 | 226,895 | +9,262 |

PRODUCTION

The Uelzena Group kept to the planned investments for the reporting year 2021 and has implemented them or is in the process of implementation. The primary objective for all sites was the improvement in energy efficiency and product optimisation. One strategic objective of the Group, to continuously reduce the annual CO₂ emissions per production tonne, was only just missed.

TOWERING INNOVATION

Our customers and employees can look forward to modern and energy-efficient spraying technology when the spray drying tower for high-care components in food and infant products is completed in 2022. The reporting year was influenced by this construction project at the Uelzen site, as it presented an increasing challenge due to the rising procurement costs for materials and technology. At the Ratzeburg site, the agglomeration plant started normal operations and investments were made at the Warmsen site in sustainable technology with the Bag-in-Box packing line and liquid blend filling. The Bismark site is being considered for expansion of the existing cheese dairy capacities.

FUTURE PERSPECTIVES

Conserving water and optimising how this resource is used is paramount at all sites. This plays a primary role in production processes with regards to increasing our production capacities and also applies to waste water treatment. The current political developments in Europe and the effects on market prices and the availability of fossil fuels will also be strongly driving the search for saving potentials with regards to gas.

EMPLOYEES

The number of employees rose to 790 people by the reporting date for 2021, which is an increase of nine employees. There were 49 training contracts in the reporting year.

THE CHANGING WORLD OF WORK

The Uelzena Group also wants to be well equipped for the future employment market. In the current labour market, it is increasingly becoming a challenge for us

to find qualified employees and retaining them in the long term. This task is even more difficult due to regional site disadvantages, lack of specialist personnel and, last but not least, uncertainties due to Covid-19.

Uelzena worked on their own employer brand in the reporting year as a foundation for a better outlook. Implementation is being pressed ahead at all sites. It is based on a company culture that promotes appreciation and open communication.

REGIONAL RESPONSIBILITY

The Uelzena Group is deeply rooted in the local region at all its sites. Social responsibility has increased in significance over the last two pandemic years. Our objective continues to be that of increasing regional value creation by procuring service providers and raw materials – primarily the raw milk of our members – within each region. The very high percentage of this raw material procurement remains at the previous year level of 99 %. This is based on a procurement radius of approximately 150 km around our sites.

| | 2021 | 2020 |
|----------------------------|------|------|
| Regional value of material | 76 % | 79 % |
| Regional value of services | 17 % | 20 % |

Our social commitment to associations and
 projects remains unwavering, as well as for the voluntary efforts of our employees in each region.
 With a view to specifically supporting children and young people, various campaigns were pro-

moted at all sites in 2021 with the aim of increasing the attractiveness of the region. A completely revised code of conduct was also initiated in 2021. This revision was necessary due to the constantly rising requirements in food safety. All employees and third parties are able to transparently view the high standards of the Uelzena Group and report any infringements. There were no compliance infringements reported for the reporting year.
