

Annual report 2022

COMPANY

MILK PRODUCTION

In the 2022 reporting year, the raw milk of the member cooperatives in north-east Germany was produced within the region. In the past year, 95 % of this raw ingredient was collected from within a radius of 150 km of our sites. At almost 744 million kg, the raw milk supplied was again above the previous year's level.

GROUP RAW INGREDIENT DEVELOPMENT

Total	826,834	787,753
Sk.milk/Bmilk/ milk permeate	618	1,035
Skimmed milk/ Buttermilk concentrate	18,367	17,967
Cream	64,048	69,636
Raw milk	743,801	699,115
Quantity in t	2022	2021

KEY FIGURES

The scheduled investments were also implemented as planned for this reporting year. With fixed assets of €182 million (+ €19 million over the previous year), Uelzena's continuing modernisation and investment plan is reflected in its result. The equity ratio achieved 30.9 % and the group's annual result was €7.6 million.

OVERVIEW OF GROUP FIGURES

	2022	2021
Turnover mil. €	1,077	766
Annual surplus mil. €	7.62	6.74
Fixed assets mil. €	182	163
Equity ratio %	30.9	34.4

For the first time in the company's history, the turnover was over one billion euros at €1,077 million

Based on the strong buyer's market, the price increases led to considerable growth in some areas when compared with the previous year.

PAYOUT IN CT/KG

53.82	
(+18.38)	35.44
Uelzena eG 2022	Uelzena eG 2021

In 2022, the payout was 53.82 euro cents/kg raw milk (prev. yr: 35.44 euro cents/kg).

PRODUCTS

The shortage in supply and pricing in the market, which was partly driven by inflation, led to reduced demand from the middle of the year. As a result, decreased sales were recorded in the reporting year for the majority of product groups. However, speciality products continued to build on the volumes sold during the pandemic.

SUSTAINABLE SOURCING

As a milk-processing company, milk holds an important status as the primary raw material for the Uelzena Group. Dairy farmers make a significant contribution to the sustainable production of this raw material in order to meet the requirements of our customers regarding sustainability factors such as profitability, environmental protection, social responsibility and animal welfare.

Our cooperative's participation in the online agricultural climate check tool, "Agrar-Klimacheck" should reveal further potential for improvement at our affiliated companies. The agricultural climate check tool is a nationwide carbon footprint initiative with leading dairies participating from Lower Sax-

The focus is also on procuring raw materials from risk countries, based on the BSCI risk assessment. In relation to this, we are continually working on improving the number of certified suppliers.

MARKET DIVERSITY

Milk and plant-based raw materials are not mutually exclusive. Increasingly, our established customers are expanding their predominantly milk-based range to include plant-based alternatives in order to serve the growing demand. We recognise this opportunity for joint growth and, for example, offer plant-based cocoa beverages and oat-based toppings in our instant beverage product range. In addition, we are expanding

our range of organic and Fairtrade products.

Innovative developments were also seen in

the liquid blends and ice-cream mixes, both

implemented at our Warmsen site.

There is also an increased focus on environmentally friendly and recyclable packaging for our products.

The Uelzena Group is working closely with suppliers and customers to offer sustainable solutions.

GROUP SALES

In 2022, the market development meant that sales volumes were unable to maintain the levels of the previous year. Most of the primary product groups recorded a reduction, particularly in the milk powder product group. The positive trend in the vending sector volumes led to robust growth in speciality products.

	2022	2021	Deviation
	t	t	t
Condensed milk products, delicatessen products	24,335	26,541	-2,206
Milk fats	48,894	50,060	-1,164
Milk powder	77,384	85,241	-7,857
Cheese	30,830	31,801	-971
Speciality products	46,895	42,514	+4,381
Total main product groups	228,338	236,157	-7,819

PRODUCTION

The Uelzena Group also upheld its planned investments in the 2022 reporting year. Projects were realised or entered the implementation phase. A more efficient use of process energy took centre stage at all sites.

We consistently pursued the strategic objective of the group, which was to continually reduce the annual CO2 emissions per tonne produced despite the difficult framework conditions of the past business year.

Our top priority in spring was to prevent the anticipated shortfall in gas supply for our production sites, which saw the swift replacement of boiler burners to enable the use of heating oil from partially newly created storage capacity. This measure guaranteed that the supplied raw milk could continue to be processed daily.

INNOVATIVE PRODUCTION TECHNOLOGY

The reporting year was influenced by the completion of the new spray-drying plant and the integration of its logistics with our established high-bay warehouse at our Uelzen site. The spray-drying tower for infant food and food industry ingredients will begin regular operation in the current business year. The expansion of the cheese dairy in Bismark was scheduled for 2022 and will be implemen-

ted directly, and the new agglomeration plant in Ratzeburg was also successfully commissioned. At the Uelzen and Warmsen sites, the steps taken regarding wastewater treatment will help to substantially reduce the wastewater load in the next few years.

OUTLOOK FOR 2023

The current political developments in Europe, a price-driven procurement of materials and raw ingredients, as well as the increasing shortage of skilled labour, are the major challenges we face when implementing new projects and for our production. The potential to use renewable energies in our production processes will be investigated more urgently.

EMPLOYEES

The number of employees rose to 832 people by the reporting date for 2022, which is an increase of 42 employees. There were 55 training contracts in the reporting year.

CHANGES IN THE LABOUR MARKET

Looking ahead to the next few years, the Uelzena Group is confident of mastering the change in the labour market. By consistently implementing our employer brand and the targeted promotion of our employees, we are well positioned to remain an attractive employer in the future. One of the ways we achieve this is with further training for our employees and development schemes for our management staff. There is also a concerted effort to implement measures to attract trainees to all sites.

REGIONAL RESPONSIBILITY

The Uelzena Group is deeply rooted in the local region at all its sites and considers it a responsibility to strengthen these regions, which it does in a variety of ways. The individual companies in the group are reliable employers, customers of raw ingredients and goods, and buyers of services.

A great deal of importance is given to social interaction and so various funding projects were also supported in the regions in 2022.

	2022	2021
Regional value of material	76 %	76 %
Regional value of services	18 %	17 %

Voluntary activities undertaken by employees are also promoted and supported financially.
